TRANSMISSION BELT

The 4 drive belts can be tensioned simply and easily by means of a practical external screw system. All implements are fitted with toothed belts that, unlike plain belts, prove more effective and offer greater performance.

DOUBLE METAL FRAME PROTECTING THE REAR GATE AGAINST DAMAGES

The mulching chamber, consisting of a double metal frame increases the resistance and the integrity of the machine, while protecting the rear gate against damages.

A ROBUST AND MULTIPURPOSE HOOD

The rear hood is adjustable. Adjust it to the minimum for shredding slightly dense vegetation or maximum product recycling. Adjust it to the maximum when shredding dense vegetation or if you want to work faster, while limiting the power input.
